

Documentation to run the code:

The zip file contains:

1. Save the unzipped directory on Desktop as myflask
2. Change the paths from /supriyauppala/ to yours in code
3. Open terminal
4. Run the command 'cd Desktop'
5. Run the command 'cd myflask'
6. Run the command 'flask run'
7. Open the link that appears in the terminal in any browser(Ex: Chrome)
8. The application appears

For running the data analysis code,

1. Delete the static directory in myflask directory
2. Change the paths from /supriyauppala/ to yours in code
3. Open terminal
4. Run the command 'cd Desktop'
5. Run the command 'cd myflask'
6. Run the command 'mkdir static' // i.e create an empty directory in myflask with the name static
7. Run the command 'python data.py'
8. Wait for a few minutes until the code stops running
9. Now, check the static folder whether there are images in the folder
